

Onit and McDonald's Corporation Host Webinar: Building and Executing a Legal Technology Roadmap

Having a clear vision and plan for technology has never been more important. Join us to hear Curtis Batterton from McDonald's Corporation discuss how his legal department went through the process of creating a legal technology roadmap to enable its strategic vision. He will also discuss how they are executing against this roadmap and how they are adapting their plan to the current economic and health crisis.

You'll also see:

- The process McDonald's used to define their technology roadmap
- Whether the COVID-19 crisis is causing any changes or additional hurdle
- How McDonald's uses Onit and how it is helping during this time of remote work and increased need for visibility and cost savings
