Paperless Technology & Process Innovation Workshop

Studies show that employees waste 8% of their time finding, sorting, and routing electronic and paper documents; which can cost your organization millions of dollars per year. And when documents go missing from email, network drives and file cabinets, there can be significant audit, litigation, and disclosure, risks and penalties.

To help your organization increase governance, develop an electronic content management plan, improve workflows, and hold vendors accountable CRE8 Independent Consultants is pleased to present this on-line workshop taught by George Dunn, President of CRE8 Independent Consultants.
