Pay as You Go: A Sunny Future?

The Clean Energy Solutions Center, in partnership with United Nations Foundation's Energy Access Practitioner Network, will host a free webinar to showcase work under way in pay-as-you-go energy technologies and business models that Practitioner Network members are testing and scaling.

This webinar is part of the broader work that the UN Foundation is undertaking on energy access within the UN and the World Bank's Sustainable Energy for All initiative.

The webinar will be Tuesday, Sept. 16, beginning at 9:30 a.m. Eastern time.

The speakers in this session will showcase their respective organizations' approach to pay-as-you-go models, discuss and contrast specific geographic contexts, and share their respective challenges and successes to provide collective best practices. Practitioner Network members will present on their organizations' work in this area.

Their brief presentations will be followed by a discussion among the panelists, moderated by Jacob Winiecki, Energy Sector Specialist, the Consultative Group to Assist the Poor (CGAP). The webinar will conclude with an interactive question-and-answer session with webinar participants.

Register for the webinar.
