Performing Construction Contract Risk Analysis

Baker Tilly hosts a complimentary on-demand webinar on how to analyze a contract for project risk and learn how to develop a risk mitigation plan.

The webinar includes a case study review of guarantee maximum price, stipulated sum, and unit priced contracts.

Topics also include: What a contract risk analysis is, decomposing a contract, contract assessment red flags, and refining contract content.

On its website, Baker Tilly says learning objectives include gaining the ability to assess a contract for risk, recognize unfavorable contract provisions, uncover contract omissions, and identify project controls or actions to help mitigate construction project risk.

Watch the webinar and download the slides.
