On-Demand: Before You Outsource, Protect Your IP & Mitigate Open Source Risks

Black Duck Software has posted a **complimentary on-demand webinar** discussing ways organizations can outsource to meet their development needs and also address open source security and management risks before giving contractors access to their valuable technologies.

“Today’s rapidly changing technologies, including the proliferation of open source and the accelerating shift to the cloud, are increasing the use of outside experts for both application development and IT solutions,” the company says on its website. “At the same time, IP security is top of mind worldwide.”

The presenter is Jim Markwith, co-founder and managing partner of Symons Markwith LLP’s Seattle and Washington, DC area offices.

He is an experienced technology and corporate transactions attorney with over 20 years of experience. His clients range from start-ups to fortune 50 technology leaders, including computer software, on-line retail, and Healthcare IT product and service developers.

Prior to private practice, Markwith held executive and senior in-house legal positions with Microsoft, Adobe Systems, and Allscripts Healthcare. He received his J.D. degree from Santa Clara University School of Law, and is a member of the California, Washington, DC, and Washington State Bar Associations.
