On-Demand: Successfully Navigating Open Source Software Issues in M&A

Black Duck Software has posted online a **complimentary webinar** examining key open source software-related issues and deal points in M&A, licensing and other transactions.

Cybersecurity has become one of the areas where substantive diligence should be conducted not as an afterthought but as an integral part of the M&A process for any deal, particularly those that involve targets with any kind of online presence, Black Duck says on its website.

The continued growth in the use of open source software underscores the importance of thorough software due diligence.

Understanding these key legal and technical risks, as well as strategies for mitigating them, will help you speed and smooth negotiations, avoid protracted due diligence and get better deal terms.
