Webinar: Open Source Security and Compliance – Lessons Learned

Flexera will present a **complimentary webinar** on how open source security and compliance have grown to be a big part of the cybersecurity and legal portfolio.

Presenter Jeff Luszcz, vice president of product management for Flexera, also will share special insights from Flexera's open source auditing team for the past year.

The event will be Wednesday, Feb. 21, 2018, beginning at 11 a.m. Central time.

Topics will include:

- Open source vulnerabilities and licenses that made the news in 2017.
- Closing the risk window – How long do you really have to mitigate a vulnerability once it is discovered?
- How do GDPR laws affect your use of open source?
- How you can improve your open source security and compliance process.

Register for the webinar.
