Webinar: Automating with a Legal Ops Platform vs Siloed Product Solutions

Kim Technologies will present a complimentary webinar, "**Automating with a Legal Ops Platform vs Siloed Product Solutions**," on May 3, 2018, beginning at 1 p.m. EDT.

"The benefits of a unified software platform over multiple siloed products are clear," the company says on its website. "Who wouldn't want to keep all their data in one place; search and report on anything at the click of a button; provide a seamless user experience across the entire department or organization? Traditionally, this 'holy grail' has taken huge amounts of time and money to implement and maintain, and has rarely been an option for Legal. Instead, most law departments and law firms have organically grown a hodge-podge of software siloes that create an obstacle to innovation, efficiency and transparency."

This webinar will cover:

- Global AI market update
- Preparing for the Age of Data
- Platform vs Product and why it matters
- To code or not to code, that is the question
- Automating workflows, documents and dashboards in hours, with no IT support!
- Q&A session

Register for the webinar.
