Download: Cyber-Risk Oversight: Current and Emerging Practices

The NACD Risk Oversight Advisory Council has published a **complimentary briefing** of "Current and Emerging Practices in Cyber-Risk Oversight."

The briefing can be downloaded from the National Association of Corporate Directors website.

"Cyber events have become so prevalent in today's business world that it's not a matter of if a company is affected, it's a matter of when," the association warns. "In a recent NACD survey, directors selected cybersecurity threats as one of the trends most likely to have the greatest effect on their companies in the next 12 months."

This resource will help directors stay on their toes in the global cybersecurity struggle—ensuring that they are prepared to respond to cyber events, fulfill corporate risk oversight expectations, and reduce overall risk exposure.
