Download: 2018 E&C Hotline & Incident Management Benchmark Report

NAVEX Global has published the 2018 Ethics & Compliance Hotline & Incident Management Benchmark Report. The report is available for **downloading** at no charge.

The newly released report shows the number of employee complaints and misconduct reports are rising – and a surprising 44 percent of all reports are substantiated.

However, cases are taking longer than ever to close, NAVEX points out in the report. "When cases take too long to resolve, employees feel unheard and are more likely to report outside your organization, where you miss the opportunity to mitigate risk with an appropriate response. Download the report to compare your compliance program against industry standards and get best practices from the experts to help you encourage internal reporting."
