Webinar: Paper Software Will Demo Contract Tools, Microsoft Word Add-In

Paper Software will present a complimentary **webinar** on Contract Tools, an add-in for Microsoft Word, that analyzes, proofreads, formats, reviews, and navigates contracts for legal departments and firms.

The webinar will be Tuesday, Dec. 18, at 1 p.m. Eastern time.

On its website, Paper Software says Contract Tools analyzes a document for such elements as provisions, defined terms, cross-references, and more. Analysis takes about two seconds or less for most contracts, and the software updates its analysis instantly.

The process takes place on the user's personal computer, rather than on a remote server, the company says.
