2019 Corporate Ediscovery Benchmark Report – Download

Zapproved has tallied the results from nearly 250 survey responses to compile its annual **Corporate Ediscovery Benchmark Report**, providing valuable insights into the current state of corporate litigation response and the direction of developing trends.

The report is available for downloading at Zapproved's website at no charge.

The company says this year's report includes comprehensive information about how organizations handle every stage of ediscovery, considering litigation volume, use of technology, and more.

The report can be used to show how an organization measures up and how to make next-level improvements. It also shows what data sources are on the horizon for ediscovery managers.

This is the seventh consecutive year Zapproved has conducted the survey.
