Download: Study Shows 4X ROI With Digital Discovery Pro

Zapproved and Hobson & Company recently partnered to research the average return on investment (ROI) that businesses gained by implementing Digital Discovery Pro for in-house ediscovery. A report on the research is available for **downloading** at no charge.

Zapproved reports that its research shows a 4X return on investment with an automated, cloud-based software solution.

“Companies in this study reported that for many of their investigations and legal matters, in-house ediscovery is more cost-effective than outsourcing,” Zapproved reports. “Our experience with clients backs that up: for organizations that are ready, automating data processing and review in house is well worth the investment. But how quickly does that investment pay for itself?”
