New eBook: Learn Technologies for Superior Fact-Finding

Modern investigations turn on electronically stored evidence, which presents unique challenges both in finding critical information and scaling efforts to cull and analyze large volumes of data.

To help deal with these challenges, **Recommind** has prepared a new ebook titled **Technology Assisted Investigation: A Quick Guide for Superior Fact-Finding**.

Designed for lawyers, investigators, and compliance officers tasked with managing and executing internal and regulatory investigations, this eBook provides practical guidance on how to leverage strategic technologies to cut through data, find what matters faster, and deliver results on time and on budget, the company says.
