

Safety Simplified: Oil & Gas Onsite Inspections

☒ Intelex offers a free on-demand webinar on conducting highly effective onsite observations and how to capitalize on the information gathered.

The webinar is hosted by Hosted by Intelex's Steve Buffett.

You need to protect your workers and the public throughout the entire lifecycle of your project, while complying with the relevant regulations, Intelex says on its website. Onsite observations are a critical piece of this puzzle, especially when you know how to capitalize on the information you gather in your onsite inspections.

Key topics covered include:

- Behavior based strategies for ensuring that you ace your next audit
- How to get consistent, reliable data from onsites conducted by multiple inspectors across multiple locations
- Making the most of your observations by discovering trends in at-risk behaviors
- Simple tactics for identifying and acting on the metrics you can use to improve safety performance
- Leveraging technology to increase the efficiency and reliability of your onsite safety management program
