

SciTec Wins Spot on Two Contracts Supporting Transformative Warfighting Capabilities

“SciTec, Inc., a non-traditional small business, was recently awarded separate contract vehicles supporting development of advanced capabilities in two of the DoD’s major technology initiatives: Joint All Domain Command and Control JADC2 and Artificial Intelligence AI. The first, awarded March 14,” reports PR Newswire in their blog.

“The Air Force Life Cycle Management Center AFLCMC for Advance Battle Management System (ABMS) supports the maturation, demonstration, and proliferation of capabilities across platforms and domains, leveraging open systems design, modern software and algorithm development in order to enable JADC2. This multi-level security.”
