

Seamlessly Implementing Safety in the Oil & Gas Industry

Industrial Safety & Hygiene News has posted a complimentary on-demand webinar on the challenging demands of maintaining safety in the oil and gas industry as it involves operators or lease owners, drillers and oil-field service companies.

“It is inherently difficult to manage,” ISHN says on its website. “As a result, implementing safety across all three functions is equally challenging. This webinar will address the activities that occur under each and how to seamlessly implement these practices to ensure worker safety.”

The presenter is Mark Hansen, a past president and a Fellow of the American Society of Safety Engineers (ASSE) and a subject matter expert on oil and gas industry safety.
