

Seminar: Federal and State Incentives for Solar Projects

✖ RER Energy Group (RER) and The Manufacturing Resource Center (MRC) offer a seminar on solar photovoltaic energy for commercial, industrial and agricultural enterprises.

The seminar will be Wednesday, July 16, 8:30-11 a.m. Eastern time, at MRC Headquarters, 960 Marcon Boulevard, Suite 200, Allentown, PA 18109.

The Pennsylvania Energy Development Authority (PEDA) is offering approximately \$12.5 million in funding for advanced energy projects. The PEDA funding, along with the recent rise in prices for PA Solar Energy Renewable Energy Credits (SRECs), has resulted in 25-35% of total solar project costs are covered through cash incentive programs and up to 70-80% or more of total solar project costs are recoverable when including tax credits and accelerated depreciation benefits. Prices for solar systems have fallen by approximately 50% over the past 2-3 years. When combined with the incentives currently available, this makes today a particularly attractive time to purchase a solar array.

Who Should Attend:

This seminar will benefit business owners and all personnel who are responsible for managing electrical energy systems and associated costs.

RER Energy Group offers free grant writing services and has helped clients obtain over \$15 million in federal and state solar grant awards.
