Use Contract Management, Analytics to Accelerate Digital Transformation

SpringCM has posted a **free on-demand webinar** discussing contract lifecycle management, including the capabilities as well as the benefits of implementation.

“To ensure your business is well-positioned for success in the 21st century, transforming critical business processes like contract management is pivotal,” the company says on its website. “As a result, Contract Lifecycle Management (CLM) and Contract Discovery and Analytics solutions are quickly being added to a company’s technology portfolio because they work together to help firms gain better visibility and control over their contracts.”

The title of the webinar is “Get Control of Your Contracts! How to Use Contract Management and Analytics to Accelerate Digital Transformation.”

Karry Kleeman, CRO at SpringCM, and Lloyd Alexander, VP of Contract Strategy at Seal Software, join guest speaker Andrew Bartels, vice president and analyst at Forrester Research Inc., to discuss contract lifecycle management in the 60-minute webinar.
