

Extending Your Compliance Team Without Expanding Your Budget

The Network Inc. will host a webinar on co-sourcing ethics and compliance Wednesday, Sept. 30, 2015, at 12 p.m. Eastern time.

“Companies choose to outsource or co-source various parts of their operations for many reasons, with budget and headcount at the top of the list. In ethics and compliance, companies have many opportunities to co-source elements of their ethics and compliance programs, beyond just the traditional hotline relationship,” The Network says on its website. “Co-sourcing brings a level of experience and expertise in a dedicated business partner, but is still a new concept for many practitioners.”

Participants will learn:

- The *benefits and potential drawbacks* of co-sourcing
- How to *determine what to co-source* and what to retain in-house
- How to measure and *maximize value and efficiency* in a co-sourced model
