Top 2015 Compliance Stories: Data Challenges and Security Issues

TechTarget has rounded up the top 10 governance, risk and compliance stories of the year, with timely advice about GRC strategy, 2015 compliance challenges and best practices for overcoming data security issues.

“This year proved, again, that governance, risk and compliance remains a top priority for companies,” the article reports. “But identifying these areas as a top concern and effectively addressing them are entirely different beasts. Between emerging governance concerns, the enactment of regulatory legislation, growing data challenges, mobile security issues and renewed encryption debates, GRC professionals have had their hands full in 2015.”

The article covers such topics as data currency, compliance with the SEC Regulation SCI, mobile device management, end-to-end encryption and more.
