

Tracking and Controlling Costs in Oil and Gas Industry

✖ Journyx is providing a free on-demand webinar for oil and gas professionals that explains how time and expense software can help track and control costs at the source, provide insights on the spot and help to truly understand project costs.

Mike Pearman of Chaparral Energy is the presenter for the webinar.

Chaparral uses Journyx as a database for time tracking, equipment utilization reporting and DOT reporting. Journyx project, time and equipment tracking software gives oil and gas companies the data needed to understand costs better at the source on a per-well basis.

About Chaparral Energy

Founded in 1988 and headquartered in Oklahoma City, Chaparral is an independent oil and natural gas exploration and production company and one of the largest oil producers in the state of Oklahoma. The company has capitalized on its sustained success in the Mid-Continent area in recent years by expanding its holdings to become a leading player in the liquids-rich northern Oklahoma Mississippian and the oil-rich Panhandle Marmaton plays. Chaparral is also the third-largest CO₂ Enhanced Oil Recovery (EOR) producer based on active projects. This position is underscored by its activity in the world-class North Burbank Unit in Osage County, Oklahoma, which is the largest oil recovery unit in the state.

About Journyx

Journyx builds software tools that help customers spend their time on things that matter. Founded in 1996, Journyx offers

customers two solutions: Journyx – project, time and expense tracking software – and Journyx PX – resource management software that provides work and financial forecasting for a complete picture of project and budget status, employee time and availability. Journyx has thousands of customers worldwide, including Chaparral Energy, Schlumberger, BP, Crate&Barrel, Big Brothers Big Sisters, Callaway Golf, Honeywell and many others.
