

Uplift in Energy and Ancillary Services Markets Workshop

☒ The Federal Energy Regulatory Commission has posted a free webcast of a recent day long seminar on uplift payments in energy and ancillary service markets operated by the Regional Transmission Organizations and Independent System Operators (RTOs/ISOs).

The presentation is divided into four panels, presenting a variety of topics on the subject.

The topics include causes of uplift, the impact on market participants, the price transparency and evolving market designs, and broader price formation issues.

Watch the on-demand seminar in Windows Media Player or in Flash Media.
