Water and Energy Issues From National and Federal Perspectives

The Center for Climate and Energy Solutions has posted a complimentary webinar designed to help utility managers address issues across the water-energy nexus.

In the webinar, Dr. Craig Zamuda from the Department of Energy (DOE) presents key findings from DOE's recently released water/energy nexus report, attempting to distill some of the key issues and risks of which water and electric utilities should be aware.

Dr. Kristen Averyt, Associate Director for Science for the Cooperative Institute for Research in Environmental Sciences and Director of the Western Water Assessment at the University of Colorado, presents her research regarding water-energy challenges that exist currently and are on the horizon.

Watch the on-demand webinar.
