# Webinar Features Enhanced Analytics with New Predictive Review

iCONECT Development LLC will present a complimentary webinar on Thursday, Nov. 13, at 1 p.m. EST to discuss iCONECT-XERA's new Predictive Review.

Featuring enhanced advanced analytics, including Predictive Review, the latest version of iCONECT-XERA® continues the focus on workflow simplicity. iCONECT-XERA will support multiple defensible predictive review workflows, automating tedious tasks and helping ensure no critical steps are missed.

Presenters will highlight enhancements to the analytics features and benefits of iCONECT-XERA, including:

• How to simplify the review process by applying predictive coding without requiring subject matter experts to identify training documents (seeds).
• Best practices that reduce review time by utilizing SmartSample®, which automates and expedites the identification of sample training documents, allowing projects to commence with minimal project management effort and considerably reducing the number of iterations.
• Ways to leverage the iVIEW® Data Visualizer to easily understand charts and graphs that provide extensive metrics, such as Precision and Recall, through the life of the project.
• Techniques to set and achieve the various goals of your review using the latest in predictive review technology.
