Webinar: Solar Solutions for Business

Greentech Media and NRG Energy Inc. will conduct **a webinar** to help companies just beginning to consider solar as part of their overall energy strategy, as well as those already further down the path to a solar solution.

The event will be Tuesday, June 7, at 2 p.m. Eastern time.

“In this webinar, two experts from NRG’s renewables team will discuss how businesses can navigate through the possibilities and logistics of a solar solution – from choosing relevant technologies to implementing effective delivery approaches,” Greentech says on its website. “Both are vital in turning the promise of solar power into the reality of a functioning system.”

Register for the webinar.
